Achievements

Author at codecanyon - https://codecanyon.net/user/kodeinfo/portfolio

Blog - http://kodeinfo.com

Web Applications

- Hour Tracking Application – Hour Tracking application is done with PHP(Laravel), AngularJS and Java. It is similar to ODesk time tracker and also provides invoicing features. Employer can see timeframe for each freelancer work with screenshots(using a bridge between JS and Java).

- Auto Posting Script – User can schedule a single post into multiple social networks, available networks are Facebook(profile, group, event, page), Twitter, Google+, LinkedIn, Instagram, PInterest etc. It also provides a beautiful timeline for all available posts

Android Applications

- Android Application for Islamic book(Quran) https://play.google.com/store/apps/details?id=com.nrclearnquran.azzikr
- https://play.google.com/store/apps/details?id=com.gcp.quran
- I have also developed android app for youcyprus, designs were provided by its owner only development work was done by me. https://in.pinterest.com/pin/452048881316985793/
- I have created app for Turkish examination KBSS and Korafya - It was a quiz app
